Skills

- JAVA | JavaScript | HTML5 | CSS3 | XML | TypeScript | React | Hibernate | Spring Boot | Redux | Git | Node | Express | Rest API
- MongoDB | PostgreSQL | My-SQL | Oracle | Google Firebase | Computer Networks | Database Management System | Data Structures | Object-Oriented Programming | Headless UI | Styled Components
- GitHub | VScode | IntelliJ IDEA | Andriod-Studios | Frontend | Backend | Full-Stack | English, Hindi

Experience

Rever - Software Developer Intern ([Certificate](#)) [Source Code](#) **May 2023 - July 2023**

- Contributed to the development of a sophisticated startup platform, encompassing essential functions such as marketing, fundraising, mentorship, and more.
- In-depth understanding and Use of React-Native, Google Firebase, Redux Tool kit, CSS, JavaScript, Git, and more.
- Strong knowledge of architectural best practices, such as REACT Well-Architected Framework, Handy, performance, and cost optimization.

Variant Labs - Software Developer Intern **Oct 2022- Dec 2022**

- Assisted in developing an Android application that helps maintain a fitness check in one's life.
- Proficiently developed mobile applications with JAVA and Google Firebase, showcasing expertise in authentication, database integration, and crafting user-friendly XML-based interactive interfaces.

Personal Projects

Job-Portal [Source Code](#) **July 2023 -Present**

- Created a web portal fostering direct job seeker-recruiter communication, consolidating job listings from Glassdoor and Bloomberg.
- Improved employment connections, optimizing job searches and recruitment with the help of custom APIs.
- Leveraged Reactjs, MongoDB, CSS, JWT auth Tokens, Express.js, and Node.js for a user-friendly, centralized platform.

Consumer to Consumer [Source Code](#) **Feb 2023 - June 2023**

- The C2C platform eliminates intermediaries, promoting direct consumer communication, negotiation, and queries.
- Facilitates real-time communication, enabling negotiation and inquiries.
- Leverages MERN stack, CSS, and APIs for enhanced user experience and real-time interaction.
- Technology Used: MERN, CSS, API, and also users to communicate in real-time

E-commerce [Source Code](#) **Nov 2022 - Jan 2023**

- An expansive e-commerce web app, offering over 50 products, ensures seamless online browsing and secure, efficient purchasing.
- Implemented the Stripe API for 100% secure payments, efficiently stored data in local storage, and delivered a modern interface design
- Technical Stacks: React.js, Redux, CSS3, JavaScript, Firebase, and Stripe API.

Education

Bachelors in Technology [INFORMATION TECHNOLOGY]	Oct 2020 - June 2024
PSIT College of Engineering, Kanpur	CGPA: 7.0
12th Standards	April 2018 - March 2019
Army Public School, Kanpur Cantt	percentage: 84

Achievements and Other Activities

- Participated and won a quiz in the National Integration Camp.
- participated and cleared the Second Round in Flipkart grid 4.0.
- Secured Second-rank command football competition.
- **JAVA-Backend:** A certified Java developer excels in Java, encompassing web apps, Spring, JDBC, and security for robust applications.
- **React:** A certified React specialist excels in reusable components, Virtual DOM, data handling, Redux, and interactive UIs.
